

Advisor

An AI assistant built into your Adobe Commerce Admin Panel

Advisor puts an AI assistant directly inside your Adobe Commerce Admin Panel. Your team asks a question in plain English and gets an answer grounded in official Commerce documentation, your own live store data, or a live web search, whichever the question needs, without ever leaving the Admin.

What it does

- Instant answers from official Adobe Commerce documentation, in plain English
- New staff onboarding in hours, not weeks
- Live store data on orders, products, customers and inventory, pulled securely and in real time
- Live web search for competitor and market research, without leaving the Admin
- Available 24/7, directly where your team already works

How it's different

Most tools in this space are either storefront chatbots built for shoppers, or self-hosted extensions that require your own OpenAI account and technical upkeep. Advisor is a fully managed assistant: nothing to install, nothing to maintain, and answers grounded in official documentation rather than a general-purpose model guessing.

Pricing

Every subscription starts with a two-week free trial, full access, no charge. After that, billing continues automatically unless you cancel.

What's included	Price
1,000 questions per brand, per month	£100 + VAT per month
Additional 100 questions (doesn't expire)	£5 + VAT

It works like our retainers: your monthly allowance is use-it-or-lose-it, but any top-ups you buy carry over rather than expiring.

Advisor grows with you. Later phases, including deeper analytics and content intelligence, will be available as optional upgrades on top of your subscription.

Pricing and plan structure may be updated from time to time; we'll always give advance notice ahead of any change.

| Getting started

Deliberately minimal, we manage everything else:

- Adobe Commerce Cloud, most of our clients are already on this
- App Builder entitlement, included in most Commerce Cloud licences by default
- A System Integration set up in your Admin, takes a few minutes, no technical knowledge required

Currently available for Adobe Commerce Cloud (PaaS) clients. If you're on a different edition, get in touch and we'll let you know when it's supported.

| Why Objectsource

- Outcomes over hours: the focus is on results, not billable time
- No gatekeepers: direct access to senior specialists, no account managers in the way
- 17 years of deep Adobe Commerce experience
